JOURNAL OF POWER SOURCES

Subject Index of Volume 59

Absorptive glass-mat separators
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Acid stratification
new operational strategies for gelled-electrolyte lead/acid batteries, 137
Active-material utilization
active-material additives for high-rate lead/acid batteries: have there been any positive advances?, 31
Air pollution
design and development of a zero-emission scooter for Taiwan, 185
ALABC
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Antimony
the effects of geometrical and process variables on the quality of cast-on-strap joints, 71
Automotive batteies
separators for automotive lead/acid batteries: selection of suitable types for different climate zones, 51

Ball mill
leady oxide for lead/acid battery positive plates: scope for improvement?, 17
Barton pot
leady oxide for lead/acid battery positive plates: scope for improvement?, 17
Basel Convention
the Basel Convention: effect on the Asian secondary lead industry, 1
Batteries
requirements for batteries in remote-area power-supply systems based on technical modelling and field experience, 99
development of valve-regulated lead/acid batteries for distributed power requirements, 147
Battery industry
the battery recycling loop: a European perspective, 107
Battery separators
automotive lead/acid battery separators: a global overview, 45
Bismuth
evaluation of lead–calcium–tin–aluminium grid alloys for valve-regulated lead/acid batteries, 123

Calcium
microstructure and properties of continuously cast, lead-alloy strip for lead/acid battery grids, 63
evaluation of lead–calcium–tin–aluminium grid alloys for valve-regulated lead/acid batteries, 123
Capacity
lead/acid battery myths, 81
Capacity loss
when is capacity loss in lead/acid batteries 'premature'?, 87
Casting
microstructure and properties of continuously cast, lead-alloy strip for lead/acid battery grids, 63
Cast-on-strap
the effects of geometrical and process variables on the quality of cast-on-strap joints, 71
Catalysts
external recombination system for vented lead/acid batteries used in float service, 119
Charge management
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9
Charging
study and application of several-step tank formation of lead/acid battery plates, 59
lead/acid battery technology, 199
Compression
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9
when is capacity loss in lead/acid batteries 'premature'?, 87
valve-regulated lead/acid batteries: they are not all the same!, 115
a review of physical properties of separators for valve-regulated lead/acid batteries, 131
Conductive additives
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Conductivity
active-material additives for high-rate lead/acid batteries: have there been any positive advances?, 31
when is capacity loss in lead/acid batteries 'premature'?, 87
Construction principles
automotive lead/acid battery separators: a global overview, 45
Controlled power charge/discharge
evaluation of lead/acid batteries under simulated electric-vehicle duty: development of design parameters on the basis of SFUDS performance, 177
Curing
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
lead/acid battery technology, 199
Cycle life
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9
external recombination system for vented lead/acid batteries used in float service, 119
new operational strategies for gelled-electrolyte lead/acid batteries, 137

Deep-cycle performances
lead/acid battery myths, 81
Development trends
automotive lead/acid battery separators: a global overview, 45

Elsevier Science S.A.

Disposal
the Basel Convention: effect on the Asian secondary lead industry, 1
Dry charge
valve-regulated lead/acid batteries: they are not all the same!, 115

Efficiency
study and application of several-step tank formation of lead/acid battery plates, 59
Electric motorcycle
design and development of a zero-emission scooter for Taiwan, 185
Electric vehicles
active-material additives for high-rate lead/acid batteries: have there been any positive advances?, 31
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
valve-regulated lead/acid batteries for electric vehicles: present and future, 171
evaluation of lead/acid batteries under simulated electric-vehicle duty: development of design parameters on the basis of SFUDS performance, 177
Electrolyte stratification
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9
Electro-osmotic promoters
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Envelope separators
separators for automotive lead/acid batteries: selection of suitable types for different climate zones, 51
Environment
the battery recycling loop: a European perspective, 107
Environmental impact
lead/acid battery myths, 81
Europe
the battery recycling loop: a European perspective, 107
Expanders
a view on chemically synthesized expanders for lead/acid battery negative plates, 25

Failure mode
failure modes of valve-regulated lead/acid batteries, 153
valve-regulated lead/acid batteries, 191
Formation
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
lead/acid battery technology, 199

Gas recombination
external recombination system for vented lead/acid batteries used in float service, 119
Gelled-electrolyte
new operational strategies for gelled-electrolyte lead/acid batteries, 137
Glass mat
separators for automotive lead/acid batteries: selection of suitable types for different climate zones, 51
Grid alloy
microstructure and properties of continuously cast, lead-alloy strip for lead/acid battery grids, 63
evaluation of lead–calcium–tin–aluminium grid alloys for valve-regulated lead/acid batteries, 123
Grid alloys
the effects of geometrical and process variables on the quality of cast-on-strap joints, 71
lead/acid battery technology, 199
Grid growth
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9

Lead
the Basel Convention: effect on the Asian secondary lead industry, 1
microstructure and properties of continuously cast, lead-alloy strip for lead/acid battery grids, 63
the effects of geometrical and process variables on the quality of cast-on-strap joints, 71
evaluation of lead–calcium–tin–aluminium grid alloys for valve-regulated lead/acid batteries, 123
Lead/acid batteries
the Basel Convention: effect on the Asian secondary lead industry, 1
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9
a view on chemically synthesized expanders for lead/acid battery negative plates, 25
active-material additives for high-rate lead/acid batteries: have there been any positive advances?, 31
automotive lead/acid battery separators: a global overview, 45
separators for automotive lead/acid batteries: selection of suitable types for different climate zones, 51
study and application of several-step tank formation of lead/acid battery plates, 59
microstructure and properties of continuously cast, lead-alloy strip for lead/acid battery grids, 63
the effects of geometrical and process variables on the quality of cast-on-strap joints, 71
lead/acid battery myths, 81
when is capacity loss in lead/acid batteries 'premature'?, 87
the battery recycling loop: a European perspective, 107
valve-regulated lead/acid batteries: they are not all the same!, 115
external recombination system for vented lead/acid batteries used in float service, 119
evaluation of lead–calcium–tin–aluminium grid alloys for valve-regulated lead/acid batteries, 123
a review of physical properties of separators for valve-regulated lead/acid batteries, 131
new operational strategies for gelled-electrolyte lead/acid batteries, 137
valve-regulated lead/acid batteries for SLI use in Japan, 143
development of valve-regulated lead/acid batteries for distributed power requirements, 147
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
valve-regulated lead/acid batteries for electric vehicles: present and future, 171
design and development of a zero-emission scooter for Taiwan, 185
valve-regulated lead/acid batteries, 191
lead/acid battery technology, 199
Lead/acid battery
leady oxide for lead/acid battery positive plates: scope for improvement?, 17
Lead alloys
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Lead industry
the battery recycling loop: a European perspective, 107
Lead sulfate
valve-regulated lead/acid batteries: they are not all the same!, 115
Leady oxide
leady oxide for lead/acid battery positive plates: scope for improvement?, 17
lead/acid battery technology, 199

Market shares
automotive lead/acid battery separators: a global overview, 45

Mass balance
valve-regulated lead/acid batteries, 191
Microglass separators
a review of physical properties of separators for valve-regulated lead/acid batteries, 131
Motorcycle batteries
valve-regulated lead/acid batteries for SLI use in Japan, 143

Negative plates
a view on chemically synthesized expanders for lead/acid battery negative plates, 25
failure modes of valve-regulated lead/acid batteries, 153

Palladium
external recombination system for vented lead/acid batteries used in float service, 119
Partial-state-of-charge
new operational strategies for gelled-electrolyte lead/acid batteries, 137
Paste mixing
lead/acid battery technology, 199
Phosphoric acid
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Polyethylene
separators for automotive lead/acid batteries: selection of suitable types for different climate zones, 51
Porosity
when is capacity loss in lead/acid batteries 'premature'?, 87
Positive plate
leady oxide for lead/acid battery positive plates: scope for improvement?, 17
Positive-plate porosity
active-material additives for high-rate lead/acid batteries: have there been any positive advances?, 31
Positive plates
study and application of several-step tank formation of lead/acid battery plates, 59
failure modes of valve-regulated lead/acid batteries, 153
Premature capacity loss
review of factors that affect the deep cycling performance of valve-regulated lead/acid batteries, 9
new operational strategies for gelled-electrolyte lead/acid batteries, 137

Rechargeable batteries
development of valve-regulated lead/acid batteries for distributed power requirements, 147
Recharging facilities
lead/acid battery myths, 81
Recycling
the Basel Convention: effect on the Asian secondary lead industry, 1
the battery recycling loop: a European perspective, 107
Reliability
development of valve-regulated lead/acid batteries for distributed power requirements, 147
Remote-area power supplies
requirements for batteries in remote-area power-supply systems based on technical modelling and field experience, 99

Separators
collaboration in research — the ALABC:Brite-EuRam lead/acid electric-vehicle battery project, 161
Several-step formation
study and application of several-step tank formation of lead/acid battery plates, 59
SFUDS
evaluation of lead/acid batteries under simulated electric-vehicle duty: development of design parameters on the basis of SFUDS performance, 177
SLI batteries
valve-regulated lead/acid batteries for SLI use in Japan, 143
SYNTAN BNF
a view on chemically synthesized expanders for lead/acid battery negative plates, 25

Test regimes
evaluation of lead/acid batteries under simulated electric-vehicle duty: development of design parameters on the basis of SFUDS performance, 177
Thermal runaway
valve-regulated lead/acid batteries, 191
Thin-plate
evaluation of lead/acid batteries under simulated electric-vehicle duty: development of design parameters on the basis of SFUDS performance, 177
Tin
the effects of geometrical and process variables on the quality of cast-on-strap joints, 71

Valve-regulated batteries
lead/acid battery technology, 199
Valve-regulated lead/acid batteries
valve-regulated lead/acid batteries: they are not all the same!, 115
evaluation of lead–calcium–tin–aluminium grid alloys for valve-regulated lead/acid batteries, 123
a review of physical properties of separators for valve-regulated lead/acid batteries, 131
valve-regulated lead/acid batteries for SLI use in Japan, 143
development of valve-regulated lead/acid batteries for distributed power requirements, 147
failure modes of valve-regulated lead/acid batteries, 153
valve-regulated lead/acid batteries for electric vehicles: present and future, 171
evaluation of lead/acid batteries under simulated electric-vehicle duty: development of design parameters on the basis of SFUDS performance, 177
valve-regulated lead/acid batteries, 191

Water maintenance
external recombination system for vented lead/acid batteries used in float service, 119

Zero emission
design and development of a zero-emission scooter for Taiwan, 185
Zero-emission vehicles
valve-regulated lead/acid batteries for electric vehicles: present and future, 171
